CUTTING REMARKS The purpose of a saw is to cut.

It should cut easily, cut cleanly, and cut with every movement.

I prefer an Atkins Saw. Its blade is "Silver Sieel", recognized the world over as the finest cruicible steel ever made in ancient or modern times. It is hard, close-grained and tough. It holds a sharp-cutting edge longer than any other Saw. Its blade tapers perfectly from thick to thin, from handle to tip. Thus it makes leeway for itself, runs easily and does not buckle. Its temper is perfect. When bent by a crooked thrust, it springs into shape without kinking. The Atkins Saw cuts—and does it best of any. We make all types and sizes of saws, but only one grade—the best.
